

### **Amendments to the Claims**

Please amend claim 1 without prejudice to the subject matter involved. This listing of claims will replace all prior versions, and listings, of claims in the application:

#### **Listing of Claims:**

Claim 1. (Currently Amended): A microencapsulated agrochemical composition comprising an aqueous dispersion of microcapsules having material encapsulated therein wherein the microcapsules have a mean diameter of less than 2 microns and a total polymer wall concentration of less than 3 % by weight of the total composition and wherein the material encapsulated within the microcapsules comprises (a) an agrochemical (b) a water-insoluble, bioperformance-enhancing adjuvant for said agrochemical wherein said adjuvant has little or no surfactant properties, has a Hydrophile / Lipophile balance of 9 or less and is selected from a compound of formula (I)

and alkoxyated derivatives thereof wherein R is a branched or straight chain alkyl or alkenyl group having from 12 to 20 carbon atoms and X is hydroxy; primary, secondary, tertiary or quaternary amine; amine oxide; phosphonate; phosphate; phosphate ester; thiol; sulfoxide; sulphone; sulphonate; sulphate; a heterocyclic moiety; glucoside; polyglucoside or alkylated glucoside; sarcosinate; betaine; amidoamine; carboxylic acid; amide; ester; ether sulphate; ether amine; ether carboxylate; or ether phosphonate; and

(c) a water-immiscible solvent in which both the agrochemical and adjuvant are soluble and wherein the ratio of adjuvant to agrochemical is from 1:50 to 200:1.

Claims 2 – 3 (canceled).

Claim 4. (Previously presented) A composition according to claim 1, wherein the group X is alkoxyated provided the HLB of the adjuvant is not greater than 9.

Claim 5. (Previously presented) A composition according to claim 4, wherein the alkoxy group contains from 2 to 4 carbon atoms.

Claim 6. (Previously presented) A composition according to claim 5, having an average of 1 to 2 ethoxy groups per adjuvant molecule or from 1 to 20 propoxy or butoxy groups per adjuvant molecule.

Claim 7. (Previously presented) A composition according to claim 1, wherein R is an optionally alkoxyated branched or straight chain alkyl or alkenyl group containing from 16 to 20 carbon atoms.

Claim 8. (Previously Presented) A composition according to claim 7, wherein R is an optionally alkoxyated C<sub>18</sub> branched chain alkyl or C<sub>18</sub> alkenyl group.

Claim 9. (Previously Presented) A composition according to claim 8, wherein R is optionally alkoxyated oleyl or isostearyl.

Claim 10. (Previously presented) A composition according to claim 1, wherein the ratio of adjuvant to agrochemical is from 1:5 to 20:1.

Claim 11. (Previously presented) A composition according to claim 1, wherein the agrochemical is a lipophilic agrochemical.

Claim 12. (Previously presented) A composition according to claim 1, wherein the water-immiscible solvent is diesel oil; isoparaffin; xylene; a propyl benzene fraction; a mixed naphthalene and alkyl naphthalene fraction; a mineral oil; white oil; castor oil; sunflower oil; kerosene; a dimethyl amide of caprylic acid; a chlorinated aliphatic or aromatic hydrocarbon; the acetate of the n-butyl, ethyl, or methyl ether of diethylene glycol; the acetate of the methyl ether of dipropylene glycol; methylethylketone; isophorone; methyl or trimethylcyclohexanone (dihydroisophorone); hexyl or heptyl acetate; methyl oleate; or octyl methyl cinnamate; or mixtures of two or more thereof.

Claim 13. (Previously presented) A composition according to claim 1, wherein the adjuvant is of formula (II)

wherein R<sub>1</sub> is a C<sub>16</sub> to C<sub>20</sub> straight or branched chain alkyl or alkenyl group, R<sub>2</sub> is ethyl or isopropyl, n is from 8 to 30 and m is 0 or 1 and when R<sub>2</sub> is ethyl, R<sub>3</sub> is a C<sub>1</sub> to C<sub>7</sub> alkyl group and when R<sub>2</sub> is isopropyl, R<sub>3</sub> is hydrogen or a C<sub>1</sub> to C<sub>7</sub> alkyl group.
